## Materials

- Song sheets or means to project words on a screen or wall

## Where Have All The Coral Gone?

(sung to P.Seeger's 'Where Have all the Flowers Gone' with an empowering twist at the end)

Where have all the coral gone?  
Short time passing.  
Where have all the coral gone?  
Short time, there's none.  
Where have all the coral gone?  
Zooxanthellae fed them all  
When will we ever learn?  
When will we ever learn?

Where have zooxanthellae gone?  
Short time passing.  
Where have zooxanthellae gone?  
Short time, there's none.  
Where have zooxanthellae gone?  
Cooler waters everyone.  
When will we ever learn?  
When will we ever learn?

Why have all the krill gone too?  
Short time passing.  
Why have all the krill gone too?  
Short time, there's none.  
Why have all the krill gone too?  
Ice is melting in the sea.  
When will we ever learn?  
When will we ever learn?

Where have all the icebergs gone?  
Short time passing.  
Where have all the icebergs gone?  
Short time, there's none.  
Where have all the icebergs gone?  
Global warming melts them down  
When will we ever learn?  
When will we ever learn?

We've got the whole ocean in our hands  
We've got the whole wide world in our hands  
We've got the whole planet in our hands  
We've got the whole Earth in our hands!
